

Mr. DLib

New Workflow

Upcoming Improvements OAuth 2.0

- Define different user roles, e. g.:
 - Read data from web service
 - Add new data to web service
 - Merge existing data in web service with new
- Offer security
 - Prevent unknown bots from reading large amounts of data and slowing down the web service
 - Prevent unknown users from adding random data to the database

Upcoming Improvements

Data Import

- Import new data
- Merge existing data sets with new data
- **Invent reliable and more flexible algorithms**
 - Prevention of duplicate entries
 - Deal with new data entities
 - **Eliminate wrong data in PAS**

Merge existing data sets

- Detect duplicate data
- Decide on rules whether to update specific data fields
- Discussion about rules in next meeting
